SUMMARY

Diploma CSE student and developer who ships real products. Built and deployed Krishi Setu, a live agricultural marketplace with escrow payments, OpenCV quality checks, and a Hindi/English voice experience. Hands-on experience in AI project evaluation, Python programming, and Generative AI tools and workflows.

PROJECTS

Krishi Setu — Agricultural Marketplace ● LIVE

Team Krishi Mitra

- Marketplace connecting farmers directly with buyers; payments are held in escrow and released only when the buyer confirms handover with a 4-digit PIN.
- OpenCV quality pre-check grades produce before listing; hyperlocal discovery matches buyers and sellers within 25 km.
- Voice-first experience in Hindi and English, designed for low-literacy users.
- Built the complete 36-page frontend with Next.js 15, TypeScript and Tailwind CSS, following a PR-based workflow (PRs #1–#4 reviewed and merged).
